

Dear sir,

We are a company called Newrun Technology Pvt. Ltd. (www.newrun.ai). We have extensive experience in developing different computer vision applications. Our experience includes using traditional image processing techniques and deep learning based algorithms to create best solutions for given problems. We have recently developed video analysis based sports analysis products where we detected players using yolo v3 and tracked and reidentified them using deep sort algorithm. In addition to that we have team members having multiple years of experience in mobile development and we are quite confident that we will be able to complete this project successfully. We are quite eager to assist you in the project and we are looking forward to hearing from you.

Here are some examples of our previous works:

1. Face recognition and tracking

2. Emotion recognition from facial expression

https://drive.google.com/open?id=1sVJz-LWnSQtpLA6uNsd9_jSw_5KTaoX

3. OCR based app

https://drive.google.com/file/d/1rQd_ePhCMixhmlm7v9yGF8C43cFpBbdF/view

4. Chatbot

https://drive.google.com/file/d/1Qsc4UVy1XRnZ67XpM27_VZVEqHSiHaNY/view

5. Demo Audio project:

Speaker identification

https://drive.google.com/open?id=1t0Li2M4StipmOMptJWg6f_6BdTqeE4kV

6. Demo video project:

Sport video analysis (only some part)
